11. **Reflection Questions**:

A. Did your estimations reflect the actual effort?
Ans: Yes, the estimation was accurate. The task took the planned number of hours.

B. Was your backlog well-prioritized?
Ans: Yes, all the higher priority tasks were finished first and the lower priority tasks were done at the end.

C. How did your simulate sprint align with your plan?
Ans: My simulate sprint was a little off with my plan. Initially we had only 7 requirements , 5 functional and 2 non functional , however we ended up doing 8 requirements, 6 functional and 2 non functional.

D. What insights did the burndown chart give about your team's capacity?
Ans: We prioritized higher priority tasks first and the lower priority tasks later , it proved that the team can handle the tasks in an efficient and structured manner.
